WORK EXPERIENCE

EAGLERIDER

Jr. Associative Project Manager

August 2017 - Present

- Use MySQL to grab data and produce reports using Crystal Reports. I have produced over 50 reports that each had certain criteria requested by the company's accounting and management departments. In addition, the reports are used by all of the company's branches.
- Tested and debugged the company's new website across multiple platforms
- Use Photoshop to create design layouts and manage marketing emails for subscribers
- Participated in group discussions of adding new features to the website

TECHNICAL SKILLS SUMMARY

- Java, HTML5, CSS3, JavaScript, JQuery, Android Development, Django/Python, and MySQL
- Git/Github
- Photoshop
- Crystal Reports

PROJECTS

CarCare

An Android app that maintains the health of your car by recording mileage, MPG, and reminding user when car needs maintenance.

Github: <https://github.com/lee44/CarCare>

-- Java --

PatientTrak

A patient management software that schedules appointments, records patient information and payments, and generate reports using a WAMP server.

Github: <https://github.com/lee44/Web-Projects>

-- HTML5, CSS, JavaScript, Bootstrap, JQuery, PHP, & MySQL --

Calculator

A calculator that uses regular expressions to verify valid input.

Github:

https://github.com/lee44/FreeCodeCamp_Projects/tree/master/Calculator

-- HTML5, CSS, & JavaScript --

Random Quote Generator

Displays a random quote along with an embedded youtube video showing the quote spoken.

Github:
